

## Provider Communication

<b>Subject:</b> Rendering Provider Activity Report to the IDS	<b>Priority:</b> <b>High</b>
<b>Date:</b> August 1, 2003	<b>Message ID:</b> ACSBNR-07312003-1

### ***Dear Medicaid/PeachCare for Kids Provider:***

ACS is in the process of publishing a Rendering Provider Activity Report to the web portal (<http://www.ghp.georgia.gov>). This report will be available to all providers who are registered to use the web. We will also mail this report to rural providers whose provider ID ends in 'X'.

### ***What's Inside the Report?***

The report displays all paid and denied claims. It is easier to read than the Remittance Advice (RA) format and contains information more familiar to the provider community.

### ***Why the Delay?***

The large size of the Rendering Provider Activity Reports means loading them to the Portal Message Center is a time-consuming process. As such, loading the reports is taking longer than expected. ACS is aggressively developing a faster method of report delivery that will reduce the time required to make the reports available in the Message Center.

### ***Which Reports Are Now Ready?***

We completed the load for the 7/5 report and are working diligently to complete the load for the 7/12, 7/19, and 7/26 reports. We estimate that all reports for these periods will be available in your Message Center by next week.

The reports for weeks prior to 7/5 will also be made available; however, we are still working on the exact method of distribution for these previous.

### ***Our Pledge to You***

We understand the critical nature of these reports and are working to ensure they are available to you in a timely manner.
